

Best Practice 2

Title of the Practice:

Online Student Admission Process through ERP

The Context:

To keep pace with digital transformation; that is happening all around the world, it becomes obligatory to adopt these technological advancements in the academic field as early as possible. Previously it was time consuming task to take admission in any institute. One has to go there personally, but now because of Information and Communication Technology you can apply for admission anywhere in the world by sitting at home. Therefore to facilitate the admission procedure the institute has decided to go for online admission procedure with the help of ERP.

Objectives of the Practice:

To make the admissions process more transparent, time-bound, and user-friendly for students.

To make the admission procedure simple, efficient and accessible to all.

To build a database for various uses, like generating receipt, ID card, Transfer certificate etc.

To reduce time and make the process more cost effective.

The Practice:

Yuvashakti Arts and Science College, Amravati follows the admission process strictly as per norms laid down by Sant Gadge Baba Amravati University Amravati and by the Government of Maharashtra and UGC.

As decided by the administration to make the whole admission procedure online admission process is established in the college. The College uses the Online Admission Process Dotcom Pvt. Ltd, Amravati for reaching out to applicants and making the admission process transparent and user friendly. The link to get admission in the college is given on the college website

www.yuvashakticollege.org So that students seeking admission become aware about the college by visiting the website. They can compare the various options available for admission. Students also get information about different subjects that are available in the college. They can opt for subjects fetching their interest. Student has to register on the portal first and then he can upload the document which is easier. The office bearer gets the intimation of student registered and accordingly he /she guides the student for further procedure. At college admission facilitation centre is also there to guide and assist the students and their parents regarding the whole admission procedure.

Evidence of Success:

Students can take admission from anywhere with the help of ERP. Students from remote are also got benefitted by this online admission practice. It has reduced the burden on official staff to maintain the data in hard copies. The teachers can access the information of their students on their mobile and laptops and can keep record accordingly. It became easy to get the whole data audited in less time.

Problems Encountered and Resources Required:

Sometimes it becomes difficult to access the data due to internet disruption in remote areas. Non-teaching staff needed the training to explore the whole features of ERP. Basic knowledge of online application is necessary to the students. Regarding resources there should be a dynamic website which updates from time to time to inform the students about the various facilities available in the college. A computer along with good Internet connection is also required.
